AWS Certified AI Practitioner Fundamental
Microsoft Certified: Azure Fundamentals

SKILLS

CLOUD & INFRASTRUCTURE
AWS (EC2, S3, VPC, IAM)
RDS • ECS Fargate • ECR
Azure • Azure Virtual Desktop
Terraform • Linux

OPERATIONS
CloudWatch • Monitoring
Incident Response • SLA
Networking • Disaster Recovery

AUTOMATION
Lambda • Step Functions
Systems Manager • Runbooks

LANGUAGES
Gujarati • English • Hindi

SUMMARY

Cloud Operations Engineer targeting AWS Cloud Engineer roles, with experience supporting enterprise infrastructure across AWS and Azure. Skilled in **cloud provisioning, IAM and least-privilege access, monitoring, and incident response**. Built hands-on projects in **Terraform-managed AWS infrastructure**, containerized application deployment, and disaster recovery validation. Focused on secure, reliable, and well-documented cloud operations.

EXPERIENCE

PARKAR | Cloud Operations Engineer
April 2025 -- Present | Ahmedabad, India

- Provision and manage AWS **EC2, RDS, and IAM** resources for enterprise clients.
- Administer **Azure Virtual Desktop** host pools, session hosts, and user access.
- Enforce **least-privilege access**, monitor workloads, support incident resolution, and maintain **SLA compliance**.
- Maintain operational runbooks and cloud documentation for consistent support.

PARKAR | Cloud Operations Intern
January 2025 -- April 2025 | Ahmedabad, India

- Supported AWS **EC2, S3, RDS, and IAM** operations and Azure Virtual Desktop access tasks.
- Assisted with workload monitoring and documentation; earned the **AWS Cloud Practitioner** certification.

JVS TECHNOLOGIES PVT. LTD. | AWS Engineer
June 2024 -- July 2024 | Ahmedabad, India

- Assisted client deployments using **EC2, S3, and IAM**, supporting AWS configuration and infrastructure operations.

PROJECTS

BOINGBUY -- CLOUD-NATIVE E-COMMERCE | AWS · Terraform

- Migrated a Node.js/React application from one VM to a **Terraform-provisioned three-tier AWS architecture**.
- Segmented public/private subnets and used a **NAT Gateway**; deployed the API on **ECS Fargate behind an ALB**.
- Used **RDS PostgreSQL, ElastiCache Redis, ECR, S3, and CloudFront**; secured credentials with **Secrets Manager** and configured **CloudWatch alarms**.

AWS DISASTER RECOVERY AUTOMATION | AWS · Serverless

- Designed a **multi-region AWS architecture** using Route 53, ECS Fargate, and cross-region RDS replication to maintain application availability during regional failures.
- Automated **failover and recovery workflows** using Lambda, Step Functions, and CloudWatch for health validation, database promotion, and traffic rerouting.
- Conducted **disaster recovery simulations** to validate **RTO, RPO,** and application health following failover.
